## Introduction

---

The purpose of this Guide is to explain the user the easiest method to Change Application Assets without Bootloader unlock or Uninstalling the app.

Application Tile assets means the visual images used in apps to display in Tiles, App list & in Splash Screen.

**BEAWARE :** This Guide is solely on how to change Tile assets, means it won't explain any manifest edits like changing Name, Tile color, splash color and such....

For them, look in "[How to Customize Application more....](#)" Heading.

Windows 10 Mobile (Lumia) Group :- <https://t.me/Windows10Phone>

## Preparations

---

> Download Windows Universal Tools (W.U.T)

> Download SAC (System Assets Changer) W.U.T Script

## #NOTE: Before Chanigng Assets

---

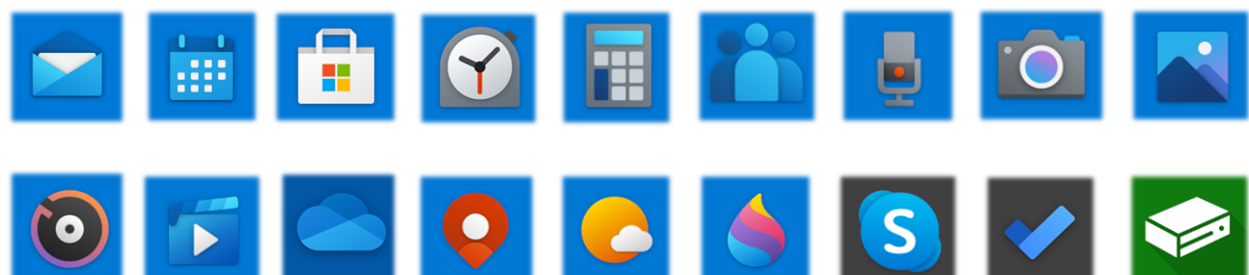

If you are looking for the new fluent design tile assets to change, you have a better option.

You can download PC Mods of the most In-Built apps which has the fluent icons included from the PC Mods Channel.

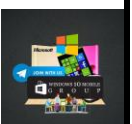

### W10M PC Mods Channel

Available Build-In apps

Windows 10 Mobile (Lumia) Group :- <https://t.me/Windows10Phone>

## How to Change Application Assets

W10M Group Application Assets Collection

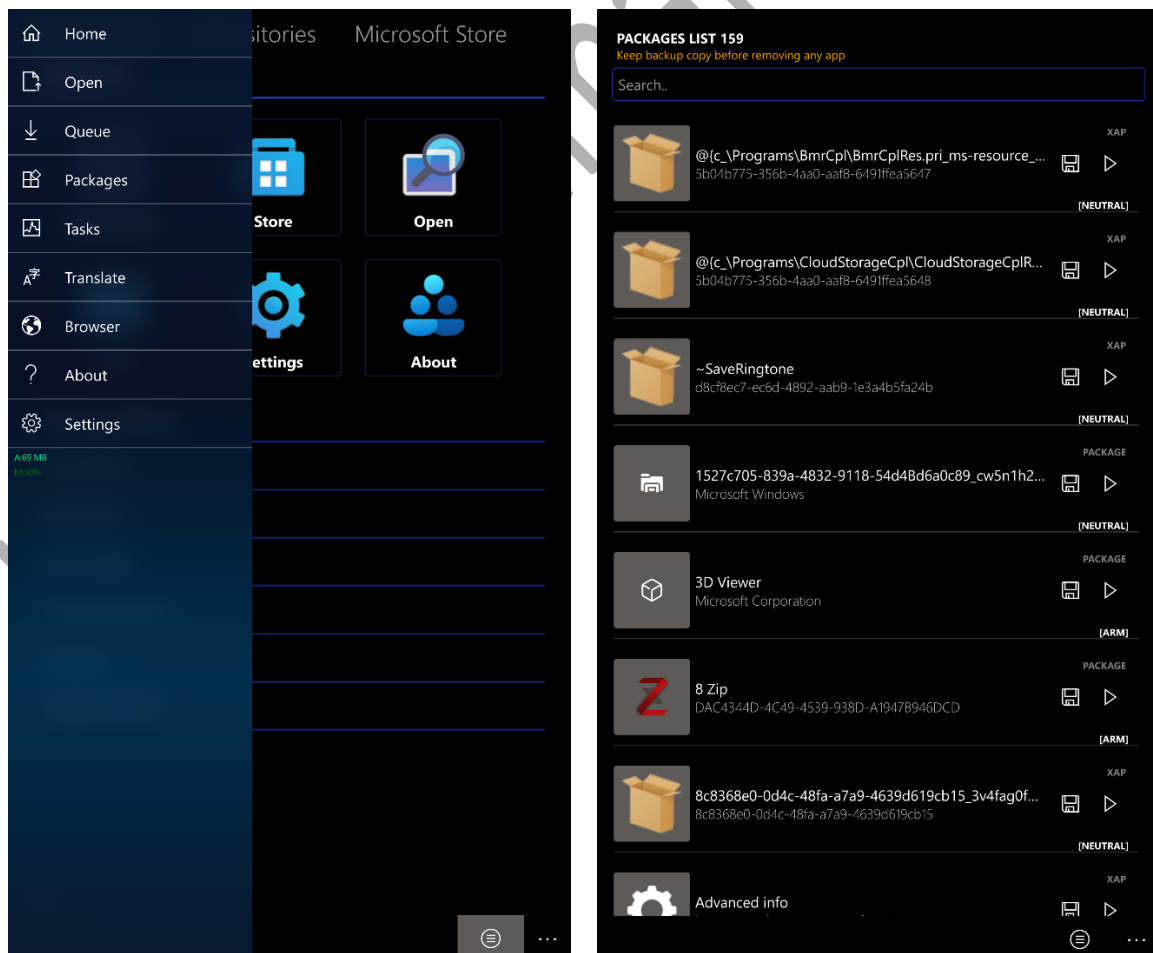

Download the assets for your application from above link and place them in different folders.

> Open Windows Universal Tools.

> Open the Hamburger bar and select **"Packages"**

> Wait for it to load the data about every package installed in your device.

When done, it will display a list of all the packages of your device.

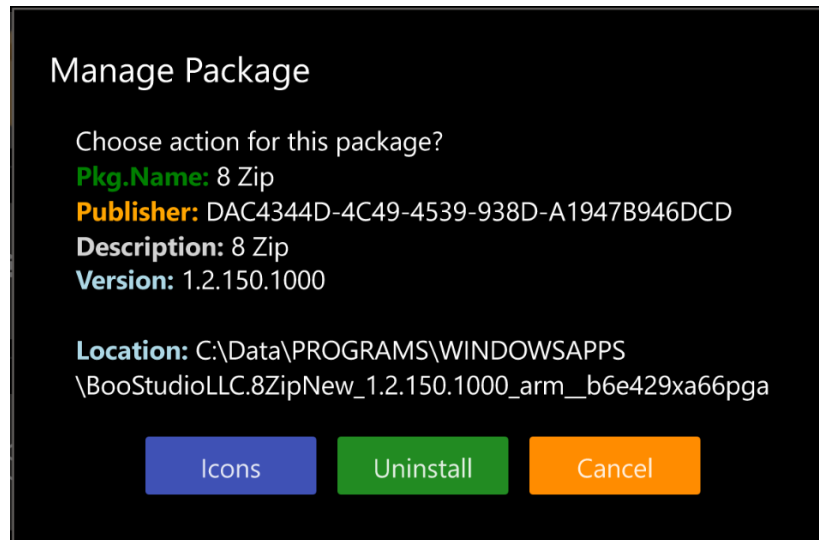

Windows 10 Mobile (Lumia) Group :- <https://t.me/Windows10Phone>

> Find and click on the package you want to change assets.

Choose “Icons”

#### NOTE

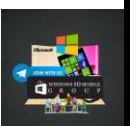

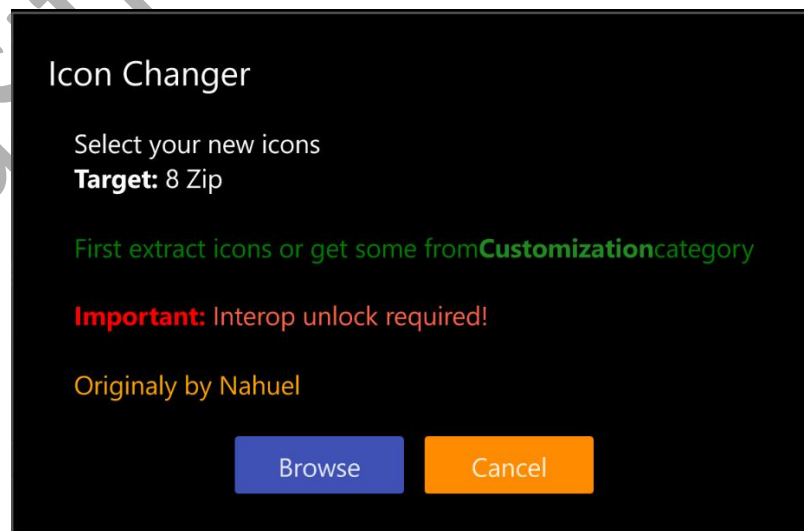

You can change Assets of any apps using this method except ;

- Cortana
- File Explorer
- GetHelp
- Settings

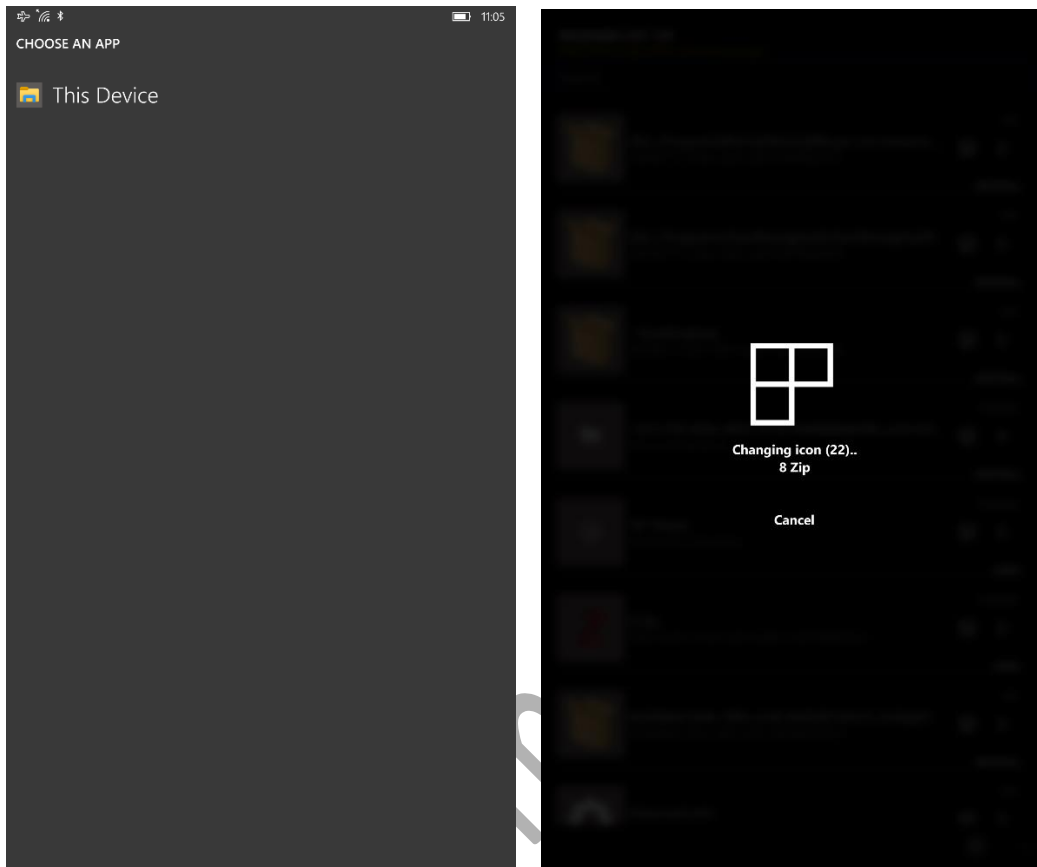

To change their Assets, check the “[How to Customize System Application Assets](#)” heading

Then the Icon changer prompt will appear.

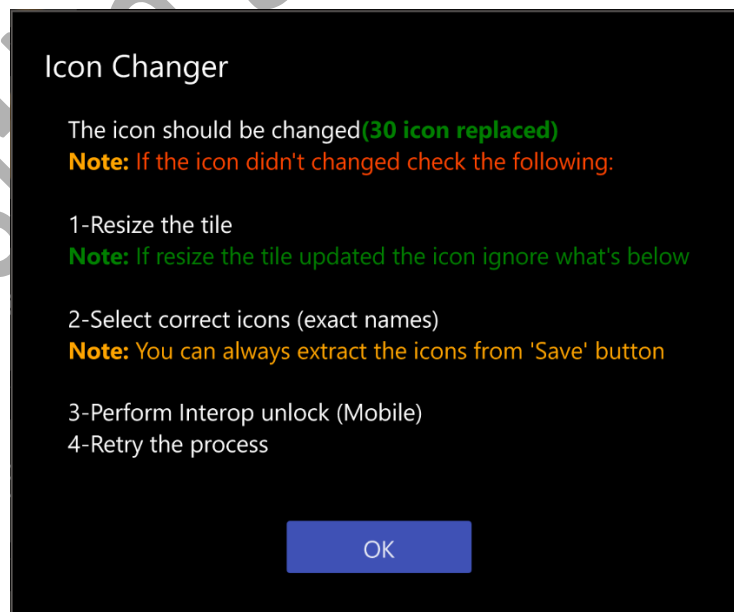

click “Browse” to choose the folder which has the assets of the app you select.

> Select the folder using the File picker which opens after clicking “**Browse**”, then the Assets change will start, wait for it to complete.

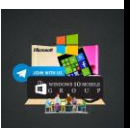

> When the process is done, it will show the end dialog.

Restart the device, do the same for any other apps except for the ones mentioned above.

## How to Change System Application Assets

---

Since the script need to connect to telnet server, you need to Set-UP CMD in your W10M Device.

### SET-UP CMD IN W10M DEVICES

“How to Set-up CMD in Windows 10 Mobile Devices” Guide

W10M Group

Mega.nz

> Click on the “**SAC.wutz**” script file which you can download in “[Preparations](#)”, and it will open in W.U.T  
Click “**Run**”

### Run Script

You are going to run direct script?

**Important:** Run scripts from trusted source only!!

Run

Stop

Click “**Yes**” to the next prompt too.

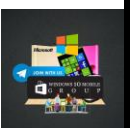

### Change Icons

Do you want to change icons for

- Settings
- File Explorer
- Cortana
- Get Help

Yes

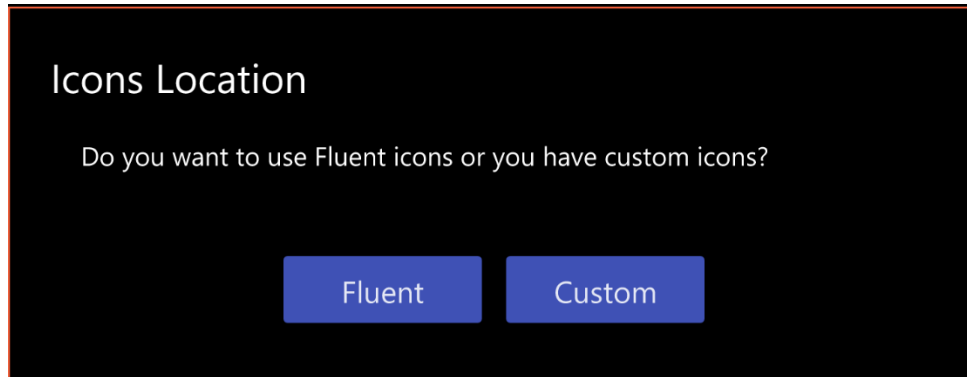

No

> Now you have a selection to make.

Click **"Fluent"** if you wish to have Fluent Icons of these apps from W10/W11

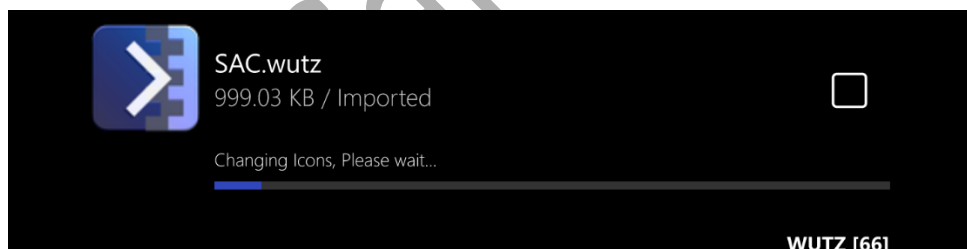

Click **"Custom"** to select your own Assets to set as the App's Assets

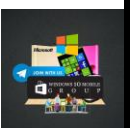

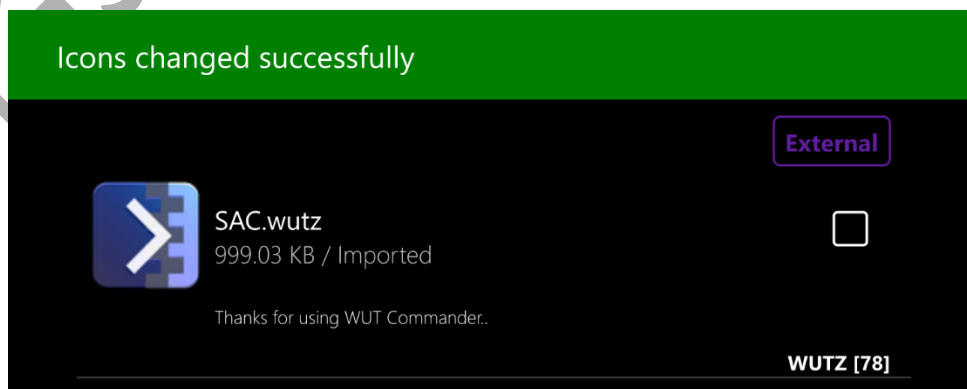

I'm not going to describe the procedure with **"Custom"** in here.

It's just to select the System app you want to change the Assets, or select all of them and change with your selected Custom Assets.

> If you chose **"Fluent"**, then it will display **"Changing Icons, Please Wait..."**

> Then when the Changing Icons is finished, it will state it with a in-app message.

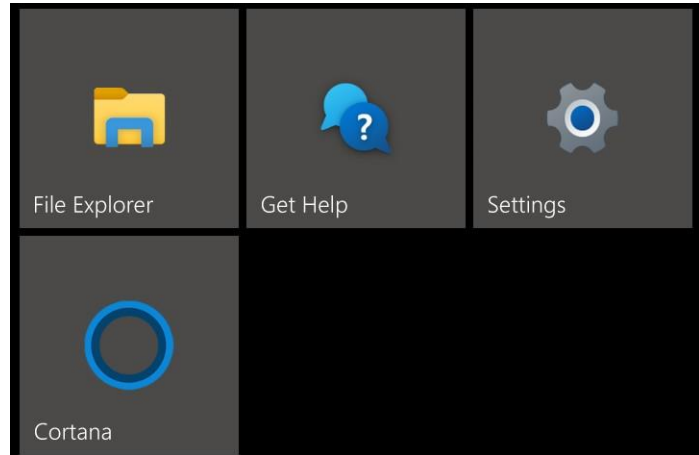

> Then Restart your Device !

When it booted back, you will see the Assets you choose applied to the System Apps mentioned above.

If you chose "Fluent", this is how they will look like

## Additional Notes

---

- To change App's Assets, your phone need to be Interop Unlocked.
- To Change System Apps's Assets, your phone should have the CMD Injected in addition to Interop Unlock.
